

ANIMALS FOR ADOPTION FROM ANGEL'S WISH

CALYPSO

Calypso is a cat that loves attention! She takes a while to warm up, but when she does, she will follow you around and "flop" for petting. Calypso does test FIV positive, so should be kept indoors. She also develops stress-related urinary tract infections easily and is fed a special diet to keep this under control. Calypso would do well in a home with no other pets and without young children to avoid any stress related issues.

TABITHA

Tabitha is a lovely, petite cat who deserves to live the rest of her life in comfort. She's an amazing little mom-cat who made it through many uncertain years caring for herself and her youngsters. She is now spayed, her teeth cleaned, a mammary tumor removed, and living a well cared for life indoors. Wouldn't you like to give her the loving home she deserves as she enjoys retirement? You won't regret bringing home this gentle, sweet gal!

CHARLOTTE

Her history is a mystery, but she's such an affectionate, sociable girl, that she must have had good experiences with kind folks in her past. Charlotte joined the Angel's Wish family of adoptees after showing up on a stranger's doorstep, looking for shelter

from the cold. She's a playful, friendly feline and is VERY fond of people, both the big and little kind. Charlotte would be very happy to be your only animal companion, but she can tolerate other cats or dogs in the household as long as they respect her personal space and don't act like a bunch of wild maniacs.

CHOCKIE

Chockie was given her name since she is the color of chocolate milk!! She is a 4 year old spayed female Miniature Schnauzer that would love to be your pal. She had some babies but is sooo done with that and is happy to be a dog instead of a mom. She is good with other dogs and loves to play!! Kids are also fine but they would have to be gentle as she is only 7#'s and could get hurt if they play too rough. She is up to date on her shots, crate trained, is working on her potty manners, is micro chipped and heart worm negative.

Learn more about these and other wonderful animals available for adoption at angelswish.org

Angel's Wish is dedicated to reducing animal overpopulation, rehoming companion animals, and raising awareness of animal welfare issues in South Central Wisconsin. These are just a few of the many animals waiting for homes. All are altered, vaccinated, dewormed and FELV/FIV tested.
